#### **DETAILED ACTION**

#### Election/Restrictions

Applicant's election of claims 1-9 in the reply filed on 11/11/2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Spaeth et al (US 5,981,945).

Regarding claim 1, Spaeth et al discloses on figure 2 a structure comprising a device 6 that emits an optical signal from a top surface of the device; a sub-mount 1 containing electrical traces 5 that are electrically connected to the device; and a cap 7 attached to the sub-mount so as to form a cavity enclosing the device, wherein the cap includes an optical element 8 (central portion of element 8) in a path of the optical signal.

Art Unit: 2815

Regarding claim 3, Spaeth et al discloses on figure 2 bonding of the cap to the sub-mount hermetically seals the cavity.

Regarding claim 4, Spaeth et al discloses on figure 2 the cap comprising a spacer ring 7 attached to the sub-mount 1; and a plate 8 (side portion of element 8) attached to the spacer ring.

Regarding claim 5, Spaeth et al discloses on figure 2 the optical element 8 (central portion of element 8) is formed on the plate 8 (side portion of element 8).

Regarding claim 6, Spaeth et al discloses on figure 2 the spacer ring comprises a silicon substrate having a hole formed there through (col. 3, lines 52-53).

Regarding claim 7, Spaeth et al discloses on figure 2 the plate 8 comprises a glass plate (col.3, line 39).

Regarding claim 8, Spaeth et al discloses on figure 2 the plate 8 comprises a glass plate (col. 3, line 39).

Claims 1,3 are rejected under 35 U.S.C. 102(b) as being anticipated by Oshio et al.

Regarding claim 1, Oshio et al discloses on figure 1 a structure comprising a device 1 that emits an optical signal from a top surface of the device; a sub-mount 10 containing electrical traces 21 that are electrically connected to the device; and a cap 10A attached to the sub-mount so as to form a cavity enclosing the device, wherein the cap includes an optical element 9 in a path of the optical signal.

Art Unit: 2815

Regarding claim 3, Oshio et al discloses on figure 1 bonding of the cap to the sub-mount hermetically seals the cavity.

Claims 1-3, 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Yuen et al.

Regarding claim 1, Yuen et al discloses on figure 4C a structure comprising a device 101 that emits an optical signal from a top surface of the device; a sub-mount 103 containing electrical traces 130 that are electrically connected to the device; and a cap 501 attached to the sub-mount so as to form a cavity enclosing the device, wherein the cap includes an optical element 543 in a path of the optical signal.

Regarding claim 2, Yuen et al discloses on figure 4C the sub-mount further comprises internal bonding pads 126, 130 that are within the cavity and connected to the device; and external terminals 125, 129 that electrically connected to the internal bonding pads and are accessible outside the cavity.

Regarding claim 3, Yuen et al discloses on figure 4C bonding of the cap to the sub-mount hermetically seals the cavity.

Regarding claim 9, Yuen et al discloses on figure 4C a post 502 attached to the cap where the optical signal emerges from the cap.

Application/Control Number: 10/665,662

Art Unit: 2815

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph Nguyen whose telephone number is (571) 272-1734. The examiner can normally be reached on Monday-Friday, 7:30 am- 4:30 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Thomas can be reached on (571) 272-1664. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306 for regular communications.
